Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

## SALE DAY INFORMATION

Pre Sale Inspection - 10:00am

Sale Commences - 1:00pm

Commercial heifers to be offered in four pens of 30. Heifers will be sold open cry with AuctionsPlus interfaced at the pens.

Angus bulls will be offered individually after the completion of the heifers – bulls will be sold open cry with video footage in the sale shed. Buyers have the option to bid from the display yards as well.

Videos of bull and female assessment details will be loaded on AuctionsPlus prior to Sale Day.

Keep up to date follow Table Top Angus on Facebook.

## ANIMAL HEALTH

Table Top Angus is JBAS 7.

All bulls have been structurally assessed by Liam Cardile.

All bulls are free of genetic conditions AM, CA, DD, NH.

All bulls have had their penis and testicles physically examined by Dr Andrew Todd, Holbrook Cattle Vets.

All bulls have been tested as BVD PI negative by Neogen.

All bulls have been vaccinated (2 doses) Ultravac 7 in 1, Pestiguard, Vibrovax, Boillis MH + IBR.

All bulls have been drenched with Cydectin Long Acting drench and have received a dose of Arrest.

All heifers have been vaccinated (2 doses) Ultravac 7 in 1 and Pestiguard.

All heifers have been checked by Dr Andrew Todd for reproductive soundness and passed.

## CATERING

Complimentary Morning Tea and Lunch will be available.

## FREIGHT ASSISTANCE

Please note the vendor or his/her agent are to make freight arrangements.

Dale Grealy has been invited to the sale to help coordinate the delivery of stock.

Please see advert for contact details.

## GST

All animals will be sold GST exclusive.

## GUARANTEE

All bulls and heifers are guaranteed under Table Top Angus bull or heifer guarantee. Please see page 4 for details.

## INSURANCE [ELDERS]

Will be available on the day. Insurance is encouraged for loss of use due to injury, illness or death. Animals purchased at sale are exposed

to transport, new environments and new animal groups which can unfortunately lead to mishaps.

## REBATE

3% will be paid to outside agents in attendance.

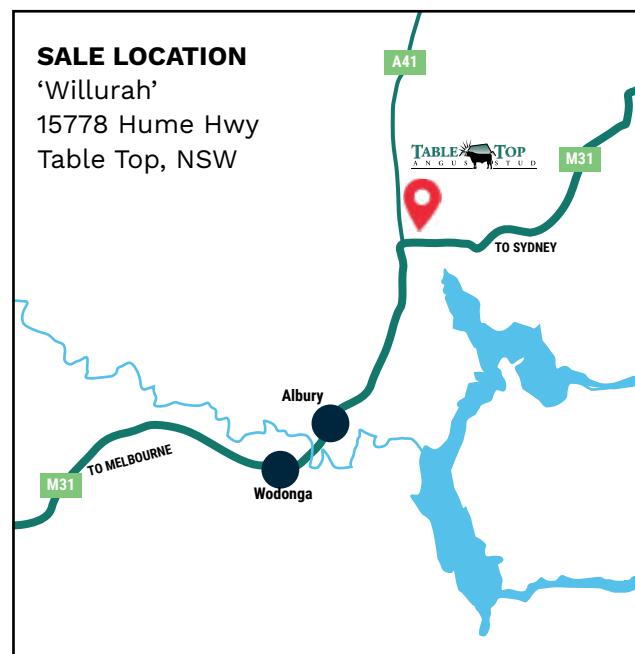

## DISCLAIMER

Table Top Angus, the selling agents, officers, agents and employees while exercising due care provide all information without responsibility and do not warrant its accuracy. They also accept no responsibility for accidents that occur on or about the venue. You attend the venue and the sale at your own risk.

People entering upon this property for any purpose whatsoever, including attendance of cattle auctions, do so at their own risk. We are not liable to you for personal injury or death suffered by you and/or for the theft, loss of or damage to any personal property caused or contributed to us by or by and person whether caused or contributed to by our or their negligence, deliberate act or unlawful conduct. "We", "Us" or "Our" refer to the owners, their employees, contractors and agents and each of them. Every case has been taken in compiling this catalogue to ensure accuracy of information supplied, but no responsibility is accepted for any errors which may have occurred.

## OH&S

For the safety of all clients, Table Top Angus requests that you do not enter the pens unnecessarily. Do not crowd the animals. No children to enter unattended. Canes are provided and encouraged to use. At Table Top Angus we aim to provide bulls that are quiet in nature however pecking order amongst bulls can sometimes be initiated unsuspectedly.

## We invite and welcome you to our 3rd Annual On Property Sale.

Seasonal conditions at Table Top Angus remain favourable and with fingers crossed 2023 looks to be another reasonable year for beef producers. Our breeding program and production system is base on a commercial beef enterprise and we share the aim to achieve maximum/efficient genetic gain in our cattle. The dizzying heights of cattle pricing may have dampened but the continued improvement in productivity and profitability traits help keep margins.

Feature lines in this year's Table Top Angus Sale include Quarterback, Quinella, Paratrooper, Full House, New Ground and Lorenzo. At Table Top Angus we have a small autumn herd of which we have held back a handful of bulls for inclusion in this year's sale. These bulls will then be followed on by the cream of our winter "T" bulls. As true to Table Top Angus we have continued to focus on bulls with good temperament and great structure, vet checked fertility and the genetic package that meets our clients market demands and expectations.

This year our bulls are even in type with strong phenotypes, carcass quality and muscle. We have bulls of APR and HBR registration noted above the individual animal. A high percentage of bulls catalogued are suited for heifer joinings.

Our heifers on offer have been vet checked for breeding ability and have been going leaps and bounds on grazing fodder crops. These heifers are sired by Table Top Angus Lorenzo sons which featured strong IMF and fat cover figures.

Enquiries or inspections are welcome before sale date. Contact Tim on 0409 747 919.

*Kind Regards*

*Tim, Jessica  
Aitch, Jaimo and Amelie*

# Bull Guarantee

At Table Top Angus we understand the economic importance of our bulls for clients. We place stringent tests on each individual bull before they leave the farm and they are provided with all the necessary vaccines to protect themselves and your herd.

We are aware that even after all the most stringent of tests and vaccine protocols there is still a risk a breeding bull may not work to their expected potential. Therefore we have created and are disclosing our Bull Guarantee.

Empty cows result in a huge cost to producers and we will do our utmost to limit these unexpected outcomes with your (the clients) help.

## GUIDELINES

A bull guarantee is provided to cover the performance of the bull in an unlikely event that the purchased bull is incapable of natural service. Not due to injury or illness acquired since leaving the property of Table Top Angus.

A bull guarantee does not cover joinings where the females do not meet recognised breeding industry standards.

We want to be the first to know!

- Producers are required to monitor/observe bulls and females during joinings.
- Producers are required to note or report any issues within 3 months after joining period but preferably sooner. Issues such as large numbers of females recycling.
- The sooner this is reported the sooner we can work towards rectifying the issue.
- Preg Testing is required within 3 months of joining period ending but highly recommend 6 weeks.

In the event of a less than acceptable outcome the bulls will need to be examined by a certified veterinarian and if confirmed unsound for work we will offer compensation in the form:-

## FIRST YEAR

(to 12 months from purchase date)

**100% of purchase price**

- Replacement with an equivalent bull that is mutually agreed upon by vendor and purchaser
- Credit for future purchases.

## SECOND YEAR

(12-24 months from purchase date)

**50% of purchase price**

- Credit for future purchases.

In the event where a credit has been issued this must be used within 12 months from date of issue.

The original purchaser is the only eligible party.

The infertile bull is to be sold for slaughter on behalf of Table Top Angus. Table Top Angus will pay for veterinary assessment if replacement or credit is issued.

We have confidence and commitment to our bulls and to you, our clients. We do not expect any producer to bear a financial burden that can be avoided by working together.

Your Success Is Our Reputation.

## *Beef Class Structural Assessment System*

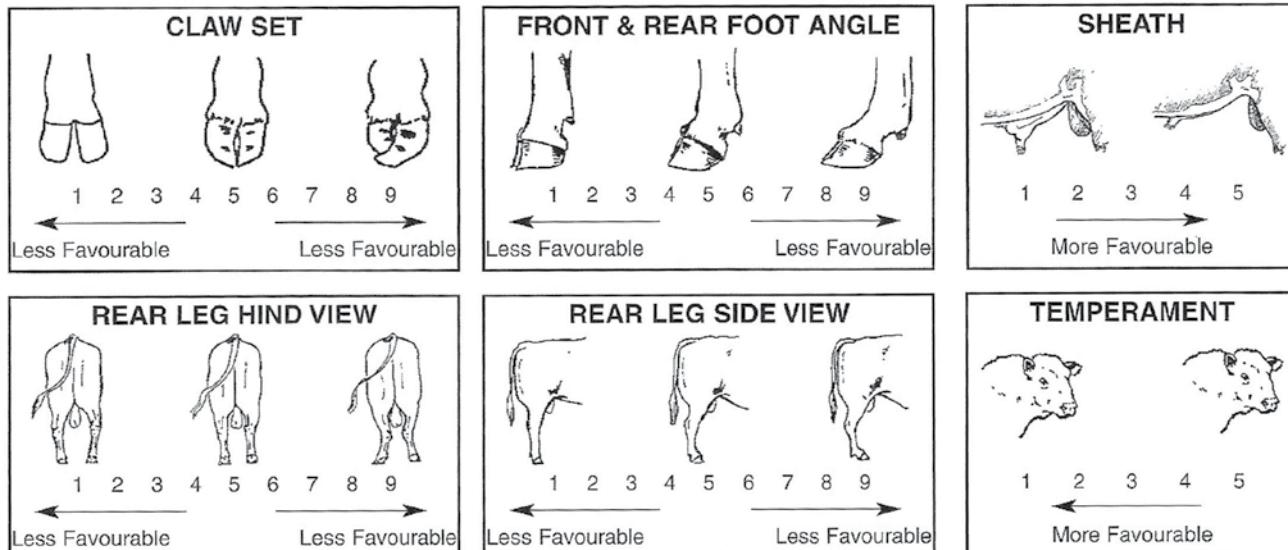

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Liam Cardile of 'BEEFXCEL' service many of the leading seedstock herds in Australia. 'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry. Liam is a full INDEPENDENT assessor.

### **HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM**

**Call Liam Cardile on 0409 572 570**

## DISCLAIMER AND PRIVACY INFORMATION

### Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

### Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

### Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

### BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

.....

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

No

Yes

Society ID No.: .....

## ACCOUNT SETTLEMENT

The signature of your Agent is required if you elect to settle through an Agent.

Agent: ..... Signature: .....

# Caring For Your Bulls

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

## 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He may be unsettled as he has left his mates and travelled on a truck for his first time. give him some time to adapt to his new surroundings.

## 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.

- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows getting in calf. Also administer booster vaccinations.

## 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimise the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

Try to observe the bull serving (mounting is not a successful serve)

Any signs for lameness

Evidence of penile or preputial swelling

Any signs of ill health (lethargic, etc)

Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

## 4. Post Joining

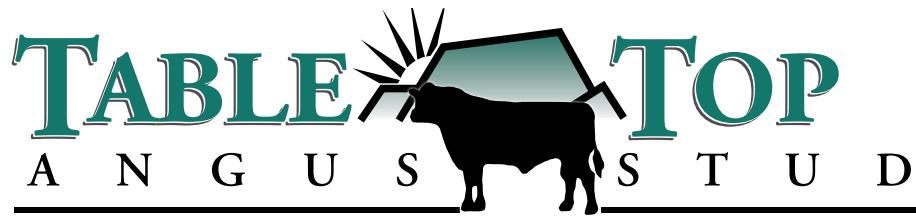

- a. Your bulls will spend most of their life in the bull paddock. You need to try to minimise bull paddock injuries (bull fights) by not over-crowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.
